

The design center DMOS GmbH in Dresden develops customer specific mixed signal integrated circuits for smart power applications, mainly used in the automotive industry. Our ASICs and ASSPs are also used in smart home appliances or the "industry 4.0". DMOS GmbH owns a building, with excellent work and development conditions close to Dresden Main Station.

The DMOS GmbH is a subsidiary of the Elmos Semiconductor SE.

Internship at the DMOS GmbH

Development of a Parser in Java

During this internship/thesis the following tasks are to be solved:

- Analysis of data and existing partial solutions
- Designing of a data structure (in collaboration with other employees)
- Test case design
- Implementation in Java

Our requirements:

- Knowledge of software partitioning and software technology
- Ideally, advanced studies in computer science or information technology (or comparable)

This is what you will benefit of:

- Equitably remuneration
- Interesting and challenging tasks in an international environment
- Comprehensive introductory and training programs
- Competent co-workers
- Flexible working time
